DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, drawn to method of communication hydraulically with a portion of wellbore, classified in class 166, subclass 305.1+.
- II. Claims 27, 28, drawn to method of determining length of hydraulic conduit of a well, classified in class 166, subclass 250.01+.
- III. Claims 29, 45, drawn to method of moving a hydraulic conduit in a well, classified in class 166, subclass 383+.
- IV. Claims 30-43, drawn to apparatus to manipulate a hydraulic conduit in well, classified in class 166, subclass 381+.
- V. Claims 44, drawn to tubing hanger, classified in class 166, subclass 98+.
- VI. Claim 46, drawn to method for connecting a hydraulic control line to a hydraulic conduit, classified in class 166, subclass 338+.
- VII. Claims 47-49, drawn to apparatus and method of maintaining a hydraulic conduit below wellhead master valve, classified in class 166, subclass 368+.
- VIII. Claims 50-53, drawn to method of injecting fluid into well, classified in class 166, subclass 305.1+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VIII each comprises different combination/ subcombination of structural features and/or different combination of operational steps each has separate utility.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

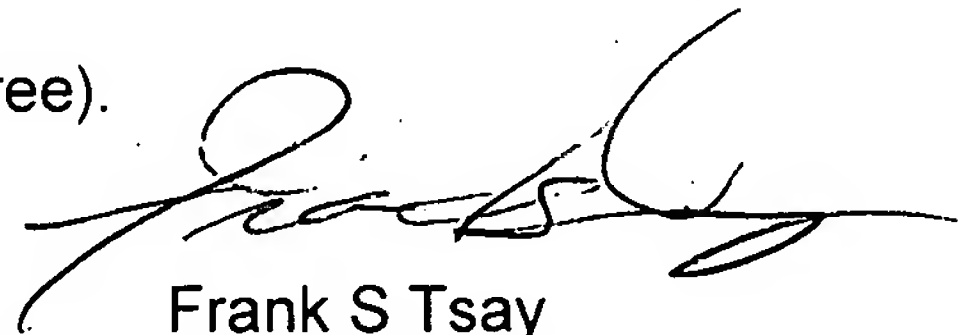

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
